#### Determining Fair Market Value IRS Pub 526

Used Clothing / Household items. The fair market value of used clothing and other personal items is usually far less than the price you paid for them. There are no fixed formulas or methods for finding the value of items of clothing. You should claim as the value the price that buyers of used items actually pay in used clothing stores, such as consignment or thrift shops.

You should support your valuation with photographs, canceled checks, receipts from your purchase of the items, or other evidence.
